Wearing jewels by Virginie Brulfert also means travelling. Why ? Because her collections have a unique line and origin. A story in which the Earth, the sky, the colours, the lights and materials intermix. Mad about stones, Virginie invites us to roam the planet with her ludic and genuine rings, bracelets and pendants.

"Clip Me", her novel concept is simply timeless, and modular jewels have now become essential fashion accessories.

New Collection

Virginie is back with two lines : Prestige and Silver. The Prestige collection is declinable in 18 carats yellow, white and pink gold. From Constellation to Twilight, through Stardust, Sunrise Promise or Night Sun, these new creations are as harmonious and original as their names. Dorjai jewels are the perfect alliance between jewelry, arts, travels, gemmology and poetry.
